Strong Condominium Apartment Completions Keep Active Listings Trending Near Historic Highs

- Condominium apartment completions have been strong over the past year. A number of newly completed units are owned by investors or by people who have seen their housing needs change. As a result, strong completions have also resulted in active listings for condominium apartments remaining at a high level from a historic perspective.
- With active listings remaining high, would-be condominium apartment buyers have benefitted from quite a bit of choice in the marketplace, especially in comparison to the tight low-rise market segments. This means that buyers have been able to weigh their options, resulting in higher average days on market compared to detached and semi-detached houses and townhouses.
- While the condominium apartment market has been well-supplied over the past year, we have also experienced strong annual increases in sales. Condominium apartments continue to offer an affordable entry point into home ownership for first-time buyers. In addition, many developments throughout the Greater Toronto Area offer options for existing home owners who are looking to change their housing situation.
- With sales increasing strongly along with listings, market conditions have been balanced, with average and median prices and the MLS® HPI apartment benchmark growing at a moderate year-over-year pace slightly above the rate of inflation.
- Looking forward through 2015, condominium apartment completions are expected to remain above average. This suggests that active listings will remain at similar levels over the next year.

Rental Market Summary

Number of Units Listed Q1 2015 vs. Q1 2014

Source: TREB

Rental Transactions and Listings Up in the First Quarter of 2015

- The number of units listed for rent in the first quarter of 2015 was up strongly in comparison to the first quarter of 2014. The increase in listings was largely the result of record occupancies in new projects in 2014. Some investors chose to rent their newly completed units.
- While rental listings were up, so too were the number of units rented, as many renter households continued to look toward investor-owned condominium apartments to meet their housing needs.
- Overall average rents for popular one-bedroom and two-bedroom units were up slightly for the TREB Market Area as a whole on a year-over-year basis.
